

Project Name

Car Parking Reservation System

Project Objective

Develop a responsive web application that allows users to view available parking slots, reserve a parking slot, manage bookings, and cancel reservations. The application contains **5 parking slots** and updates the slot status dynamically on the user interface.

Total Parking Slots

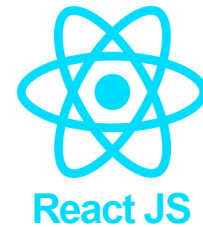

Slot Number	Status
P101	Available
P102	Available
P103	Available
P104	Available
P105	Available

Front End Technologies

- React JS
- React Hooks (useState, useEffect)
- React Router DOM

Application Pages

1. Dashboard Page

Purpose

Display overall parking statistics.

Information Displayed

- Total Slots
- Available Slots
- Booked Slots
- Occupancy Percentage

Sample Output

Total Slots : 5

Available Slots : 5

Booked Slots : 0

Occupancy Rate : 0%

2. Parking Slots Page

Purpose

Display all parking slots with their current status.

Features

- Grid Layout
- Status Indicators
- Real-Time Updates

Slot Display

P101 - Available

P102 - Available

P103 - Available

P104 - Available

P105 - Available

Status Colors

Green → Available

Red → Booked

3. Book Parking Page

Purpose

Allow users to reserve an available parking slot.

Form Fields

Customer Name

Vehicle Number

Mobile Number

Parking Slot

Booking Date

Entry Time

Validation Rules

Customer Name

- Required
- Minimum 3 characters

Vehicle Number

- Required
